Detailed Action

The amendment filed on 1-10-2005 has been entered.

Claims Rejection - 35 U.S.C. 112, second paragraph

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 and 8-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(1) In claims 1 and 9, the newly added limitation is vague and indefinite as it is not clear what width of the food block is, and what length of the cutting edge is substantially equal to the width of the food block.

(2) In claim 8, "relatively wide" is indefinite since it is unclear how wide is "relatively" wide.

Claims Rejection - 35 U.S.C. 102(b)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Gosselin (U.S. Patent No. 6,220,133).

Gosselin's cutter shows all the claimed structure. Further, Gosselin's blade tip (14a) is considered as a cutting edge since it can cut into a block of cutter, and the blade tip (14a) meets the limitation of "having a length at least substantially equal to the width of the food block" if one such food block is selected to be cut by the claimed cutter. Also, Gosselin's cutter can be used as a spatula if one intended to.

Claims Rejection - 35 U.S.C. 103(a)

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 5-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wentzel (U.S. Patent No. 2,948,064) in view of Youngberg (U.S. Patent No. 2,309,814).

Wentzel's cutter shows all the claimed invention except the cutting edge (5) does not extend transversely to afford a thrust cutting action.

Youngberg shows a food block cutter having a cutting blade (9) so arranged to facilitate a thrust cutting action.

It would have been obvious to one skilled in the art to modify Wentzel by arranging the cutting edge (5) in a transverse orientation to facilitate a power thrust cutting action as taught by Youngberg.

Indication of Allowable Subject Matter

Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Remarks

Applicant's arguments with respect to claims 1 and 5-10 have been considered but are moot in view of the new ground(s) of rejection.
